

## Leading Supplier of Precut Plywood

### **Manufacturing and Custom Plywood Capabilities**

International Wood Industries is a cut-to-size plywood plant specializing in plywood slave pallets for the material handling industry and cut-to-size particleboard for the rack industry. IWI is one of the largest suppliers of precut plywood to the material handling industry. Our capabilities in plywood range from 5' wide to 10' in length and 1/4" in thickness to 1-3/4" in thickness, and any dimensions smaller than these.

We can help determine plywood thickness for specific load requirements or develop specific grades to meet desired performances. International Wood Industries can radius corners, ease edges, cut code plate slots, route hand holes, drill patterns, and fulfill virtually any specification your customer may require.
