

Custom Cornhole Game Kits

From International Wood Industries

IWI has been supplying wood storage and shipping containers to the moving and storage industry for more than 40 years. And with so many years in the wood industry, we've perfected the process of manufacturing other unique products like the popular cornhole game.

Cornhole is fun and entertaining year-round. It's perfect as a corporate gift and for use at tradeshow, tailgating, camping, weddings and more.

Constructing our game boards

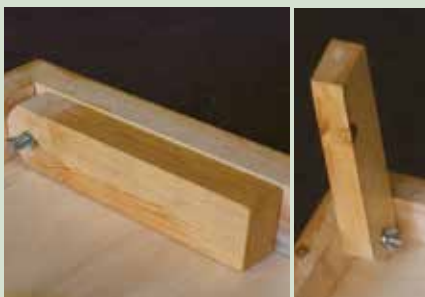

Each cornhole deck board is made out of clean and sanded 1/2" birch plywood and is precision routed on an automated machining center. The frame is built out of construction grade 2"x3" lumber and the legs are bevel cut and attached by carriage bolt and wing nut. Our hardware allows the legs to retract underneath the board for easy storage and handling. The top surface is sealed with a varnish for added protection from the elements and for a nice, finished look.

Each set comes with two game boards and eight high-quality, corn-filled, duck cloth bags in many standard colors.

Customizing your game boards

From one-offs to full production runs, you can get our game sets with a range of finishes and options—sealed finish to fully painted and customized with full decal.

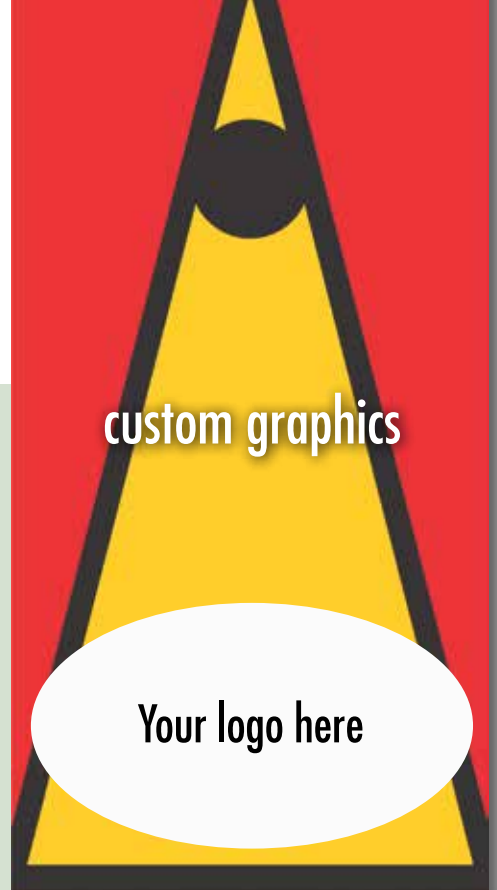

- Basic wood-grain set with sealed logo
- Optional stained wood top, painted sides
- Full or partial graphics
- Optional custom carrying handle
- Custom bag colors and logo/graphics
